

HELP INHIBIT BLEED-THROUGH ON ASPHALTIC ROOFS

Developed to maintain the fresh color of a newly coated roof, GacoFlex A4271 BleedTrap Acrylic Base Coat for asphalt roofing helps inhibit bleed-through of oil commonly found in substrates containing bitumen. This single component, easy to apply water-based sealer, helps preserve the aesthetic and reflectivity of coatings on asphaltic roofing systems. This includes built up roofing (BUR)*, modified bitumen (ModBit), and smooth or granulated asphaltic roofing membranes.

Traps Oil to Help
Inhibit Bleed-Through
