gaco.com

GacoFlex Solvent-Free Silicone Roof Coating System – the clean, economical and responsible solution for renewing weathered and leaking roofs.

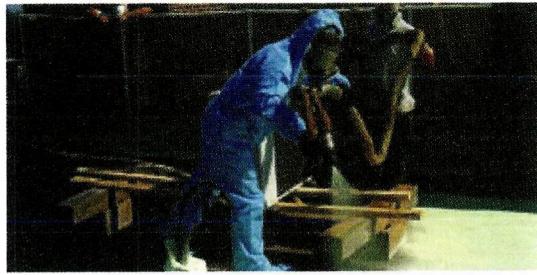

Avoid time-consuming and costly tear-offs!

There's no need to tear off and replace your weathered and leaking roof. By re-covering, you save on labor costs and avoid landfill expenses, plus your existing roof can be re-covered without any interruption to your normal business operations.

Extend the life of your roof.

Innovative silicone technology provides a seamless weather-tight seal that protects the substrate against ultraviolet light and severe weather, eliminates common sources of leaks and withstands permanent ponding water.

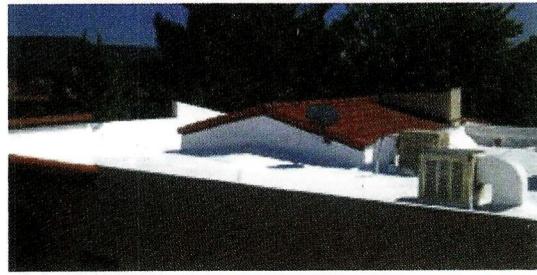

Renew and insulate.

GacoRoofFoam insulation and GacoFlex Solvent-Free 100% Silicone fully adheres to any shape or substrate to provide a monolithic system. This is the first complete system to insulate, waterproof and withstand permanent ponding water.

Excellent for use on virtually any existing or new roofing substrate.

Apply over pre-existing elastomeric roof coatings, metal roofs, built-up roofing, mineral cap sheet, and weathered single ply membranes (EPDM, PVC, Hypalon® and TPO/CPA). Re-coat existing sprayed-in-place polyurethane foam, concrete and many other coatings.

Re-covering is the responsible choice.

By re-covering your roof, you avoid waste-generating tear-offs which impact landfills. And the highly-reflective, glossy finish of GacoFlex Solvent-Free Silicone Roof Coatings can help reduce energy costs.

Labor and material warranties available.

Decades of proven performance and protection. **Guaranteed.**
