Gaco™

Spray Polyurethane Foam Offerings

The GacoRoofFoam Advantage

GacoRoofFoam is a series of sprayed-in-place closed cell polyurethane foam that bonds to any shape or size of substrate and becomes part of the structure, forming a seamless, monolithic barrier. It accommodates even the most unique roof designs and can be applied to a positive slope and promote drainage on flat roofs.

GacoRoofFoam Low GWP

In addition to our standard GacoRoofFoam (F2733), Gaco also offers a Low GWP version. GacoRoofFoam Low GWP (F2780) is manufactured with an HFO blowing agent, reducing the Global Warming Potential (GWP) of the product by over 99%. GacoRoofFoam Low GWP is Class A fire rated and UL approved and can be applied in a single pass up to 1.5” thick.

Eliminate Costly and Disruptive Tear-Offs

GacoRoofFoam’s superior adhesion often allow the system to be applied over an existing well-maintained roof, eliminating costly tear-offs. In addition to labor and landfill savings, GacoRoofFoam can be applied during normal operating hours with minimal disruptions.*

*As compared to roofing systems requiring mechanical attachment.

Lightweight

A lighter roof directly translates to less stress on the structure of the building.

Energy Efficient

Improved thermal efficiency is a key benefit of using GacoRoofFoam. The higher R-Value* of the system means that a properly installed and maintained roof will more than pay for itself as it generates energy savings year after year.

*When compared to rigid polyiso board stock, EPS, XPS, and mineral wool

Durable

When properly maintained, a spray-in-place foam is a sustainable roofing system requiring minimal maintenance with periodic reapplication of GacoFlex coatings.

GacoFlex Coatings

Durable elastomeric coatings add value and prolong roof life. Foam is only half of the polyurethane foam roofing system story.

Gaco offers a comprehensive portfolio of liquid-applied roof coating products. With silicone, urethane and acrylic solutions, we offer a variety of options to bring new life to existing roofs. Combine these options with our spray foam to create a total roof replacement solution.

Gaco is your single-source, top to bottom coating and waterproofing partner.

Gaco™

ACRYLIC

URETHANE

FOAM

SILICONE

EPOXY

Gaco is a recognized leader in innovative roofing systems, and offers best-in-class waterproofing and insulation solutions for a variety of commercial, industrial, and residential applications.

When you partner with Gaco, you get a team of experts who combine years of technical expertise and a boots-on-the-ground approach to help you on any job you have. Talk to your Area Manager today.
